Reference: Micro Tech Systems / Level 4 Telcom

To whom it may concern,

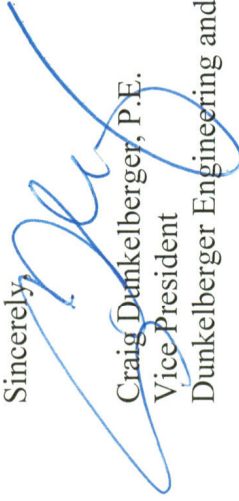

In the spring of 2012, Dunkelberger Engineering & Testing hired MicroTech Systems and their subsidiary company, Level 4 Telcom, to manage the Information Technology & Communications needs of our company's four locations. We were pleased that they were able to assume the management of all four of our offices simultaneously with no downtime or service interruptions. In addition, they were able to immediately resolve some longstanding issues that we had been encountering prior to their involvement.

We found their flat rate, all inclusive billing approach to be a very attractive way to manage our organization's IT & Communications expenses. With previous vendors, we found the management of our technology infrastructure to be a stressful and expensive reality of operating our organization. Bryan Gardner and his team went out of their way to create a fixed rate technology management and communications package that allowed us to have peace of mind that our technology needs were being completely managed. In addition, we find it comforting to know exactly how much this support is going to cost us each month.

Since MicroTech has assumed the management of our IT needs, we have seen our company's efficiency drastically improve as a direct result of the network improvements that their team put into action. Our systems are now more reliable, our network is more stable and our telecommunications have been improved. Additionally, our staff now has the peace of mind that if they do encounter a technical issue, they can contact the MicroTech / Level 4 help desk and have their issues resolved quickly.

MicroTech Systems and Level 4 Telcom continue to meet and exceed our expectations of a technology provider and I am happy to recommend them to others. If you would like any additional information about MicroTech Systems & Level 4 Telcom, you can contact me at 772-343-9787.

Sincerely,

Craig Dunkelberger, P.E.
Vice President
Dunkelberger Engineering and Testing, Inc.
